

## LIST OF SELECTED FORTHCOMING EVENTS IN 2020

### IRMMW-THz 2020 Buffalo

**September 13–18, 2020**

## 45<sup>th</sup> International Conference on Infrared, Millimeter, and Terahertz Waves

Buffalo Niagara Convention Center  
Buffalo, New York, USA

#### Conference Co-Chairs

**Andrea Markelz** University at Buffalo, USA

**Erik Einarsson** University at Buffalo, USA

#### Technical Program Chair

**Frank Hegmann** University of Alberta, Canada

#### Local Organizing Committee

**Priya Banerjee** University at Buffalo, USA

**Luis Velarde** University at Buffalo, USA

**John Cerne** University at Buffalo, USA

**Vladimir Mitin** University at Buffalo, USA

**Peter Q. Liu** University at Buffalo, USA

### Strong Microwaves and Terahertz Waves: Sources and Applications

July 5–10, 2020

Nizhny Novgorod, Russia

The Institute of Applied Physics of Russian Academy of Sciences announces that the 11th International Workshop “Strong Microwaves and Terahertz Waves: Sources and Applications” will be held on July 5–10, 2020 on a river cruise starting and ending in Nizhny Novgorod, Russia.

The side events at the workshop include the 32nd Joint Russian-German Meeting on ECRH and Gyrotrons and a school on high power microwave vacuum electronics for young scientists and PhD students. Traditionally, the

workshop is held aboard a comfortable cruise riverboat. This provides a unique opportunity for the participants to take a closer look at Russian history and culture. A sightseeing program on the route, a special program for accompanying persons, and a set of social events are scheduled.

For more detail visit the [website](#) of the Workshop.

## Important Dates

- 11 Nov 2019** Call for abstracts
- 20 Mar 2020** Abstract submission deadline
- 04 May 2020** Notification of acceptance
- 12 June 2020** Early registration deadline
- 03 July 2020** Extended abstract deadline

2020

## International Conference Terahertz and Microwave Radiation: Generation, Detection and Applications

TERA-2020 conference is devoted to the discussion of fundamental and applied problems related to the generation and detection of terahertz and microwave radiation as well as its interaction with matter.

**Tomsk, Russia, 2020**
